SYSTEM

FLATNESS BETWEEN TILES

LEVELLING SYSTEM

Levelling system ensures flatness between tiles avoiding movements during the mortar setting.

This reduces the time for the ceramic laying obtaining a perfect lippage-free finish.

A fast and 100% effective tool.

Reduces laying time.

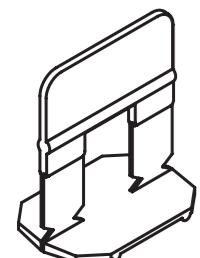

Ensures flatness between tiles.

Minimum joint less than 0,5 mm.
Available for 0,5 - 1 - 1,5 - 2 and 3 mm.

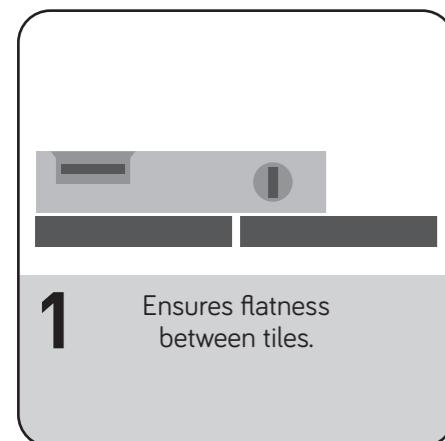

Range of use: from 3 to 30 mm.

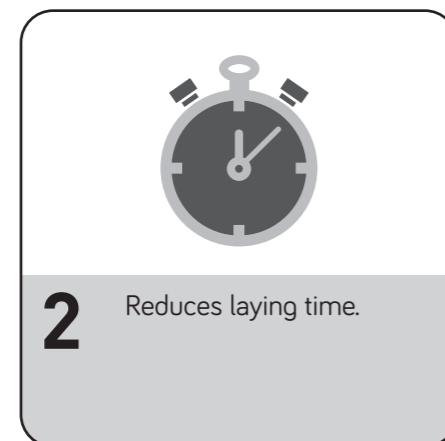

ADVANTAGES

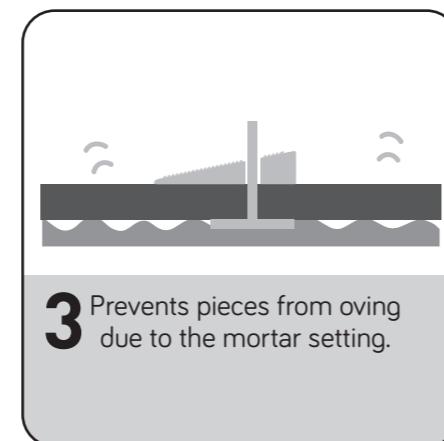

-  Levelling system Cifre Ceramics indispensable for rectified ceramics, porcelain tiling and large formats.
-  They are the only solution to avoid steps between ceramic pieces..
-  Allows for high quality finishes, saving time.

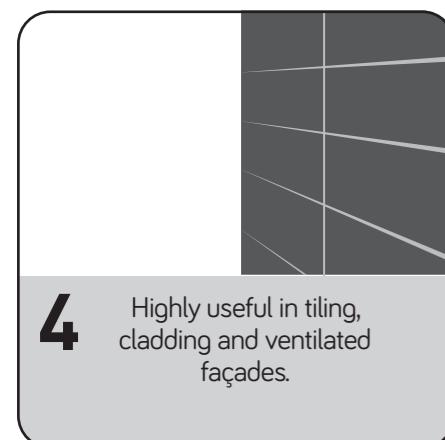

1 Ensures flatness between tiles.

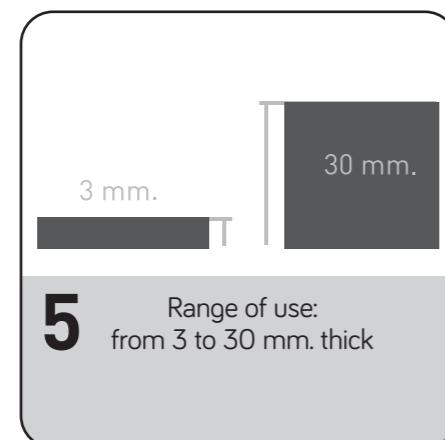

2 Reduces laying time.

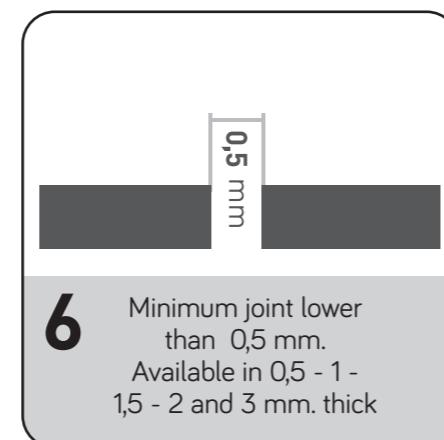

3 Prevents pieces from owing due to the mortar setting.

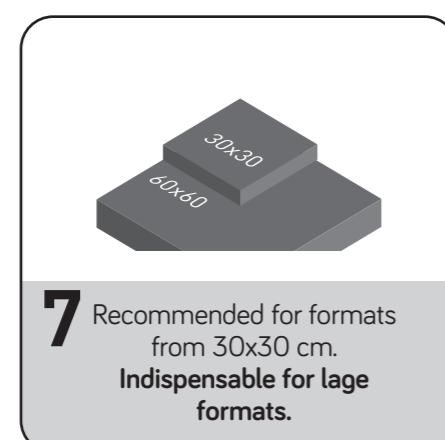

4 Highly useful in tiling, cladding and ventilated façades.

5 Range of use: from 3 to 30 mm. thick

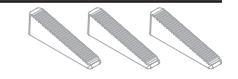

6 Minimum joint lower than 0,5 mm.
Available in 0,5 - 1 - 1,5 - 2 and 3 mm. thick

7 Recommended for formats from 30x30 cm.
Indispensable for large formats.

SYSTEM COMPONENTS

1 | Clips

Clips are made of high quality material, which allows clips to be highly resistant to traction so that heavy pieces can be adjusted fast and effectively. Clips have side cuts (patented), which allow us to remove them easily, just with a knock on the side in the joint direction, when the work is finished (mortar set-ting)..

2 | Wedges

Wedges have saw-shaped teeth to be adus-ted to the crosshead precisely and achieve top efficiency. The wedge base is round not to damage ceramics. Wedges can be reused.

3 | Pliers Ceramic

The main characteristic is its scale bar for the floor tile thickness (patented system). The scale bar allows us to adjust the tool to the pressure needed easily, quickly and effectively.

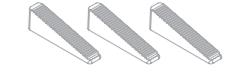

4 | Kit Ceramic

Kit de 100 Calzos: Particularly desinged to start using leveling systems.

Consists : 100 crossheads, 100 wedges and pliers.

STEPS TO FOLLOW

levelling SYSTEM

QR CODE

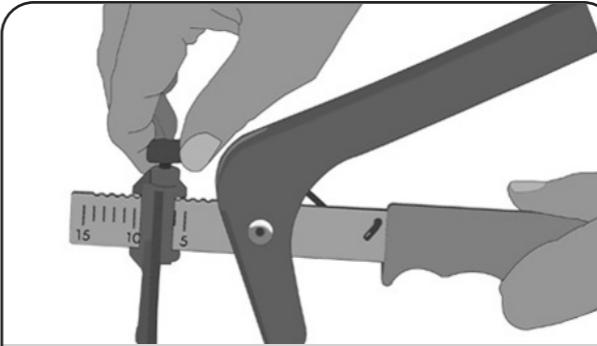

VIDEO CIFRE CERAMIC LEVELLING SYSTEM.

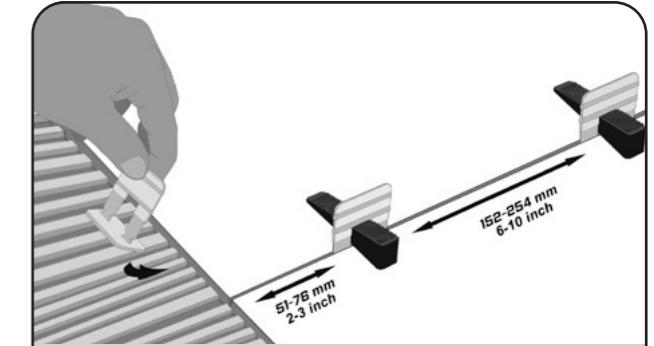

Read the qr and it will show you our video explaining the levelling system.

For perfect installation finished we recommend our levelling system.

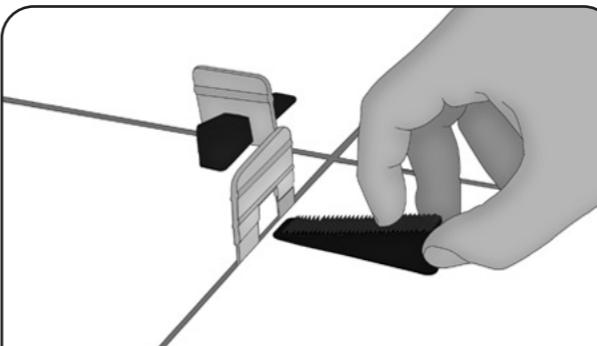

We will not accept any complaint if the material has not been installed with our levelling system or a similar one.

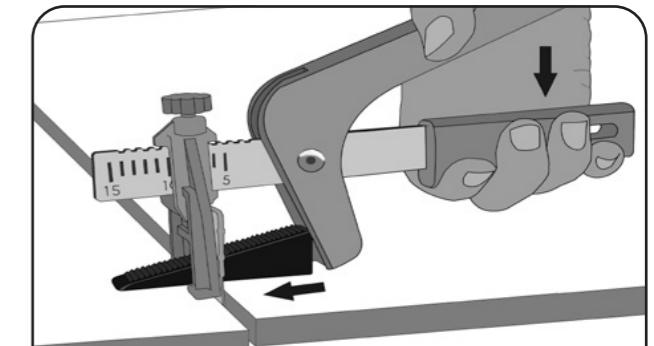

1º Set the pliers
Set the pliers to the scale according to the ceramics thickness.

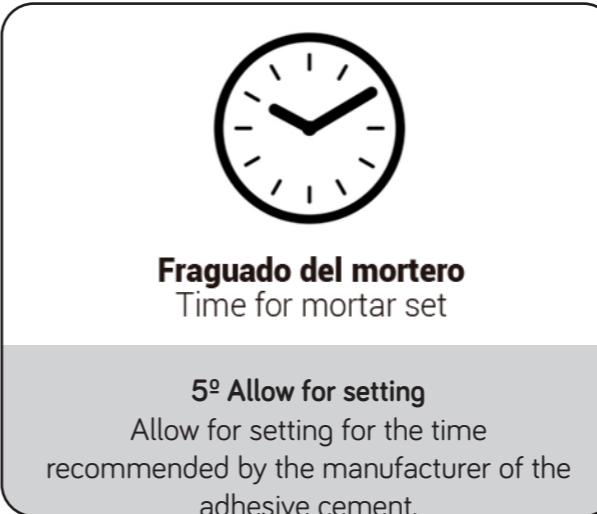

2º Place the crosshead
We will introduce the clip and continue laying the adjacent tiles.

3º Introduce the wedges
When laying the adjacent tiles, introduce the wedges in the clips manually.

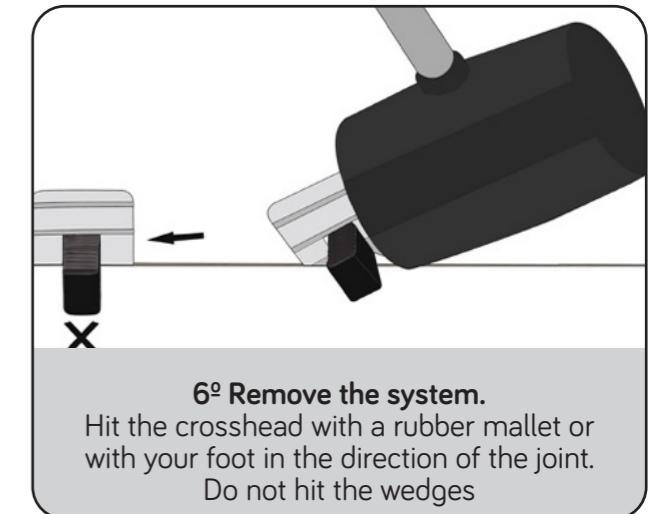

4º Tighten
Tighten the wedges with the pliers to level the pieces.

Fraguado del mortero
Time for mortar set

5º Allow for setting
Allow for setting for the time recommended by the manufacturer of the adhesive cement.

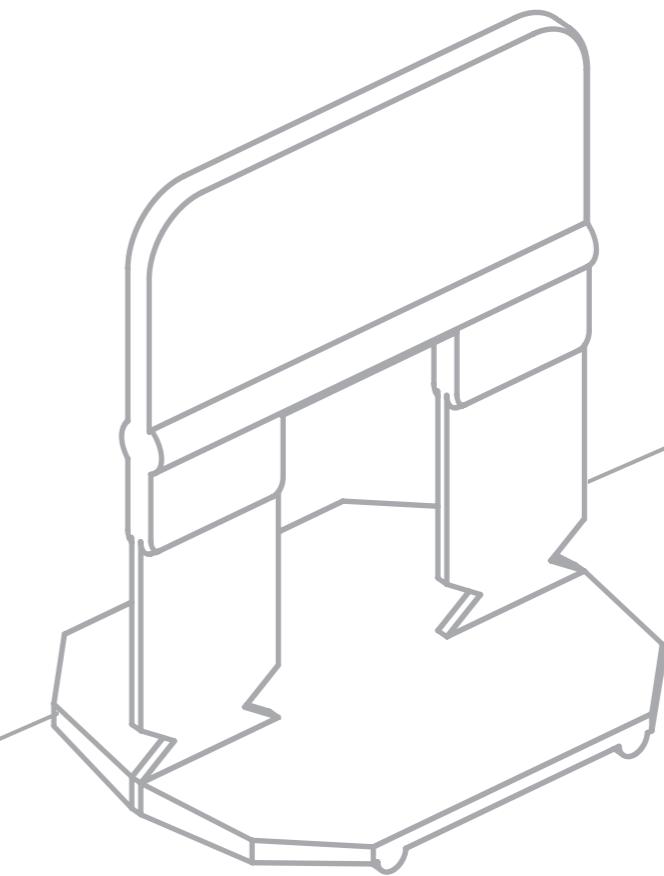

6º Remove the system.
Hit the crosshead with a rubber mallet or with your foot in the direction of the joint. Do not hit the wedges

TECHNICAL
INFORMATION

CLIPS

SP 2059

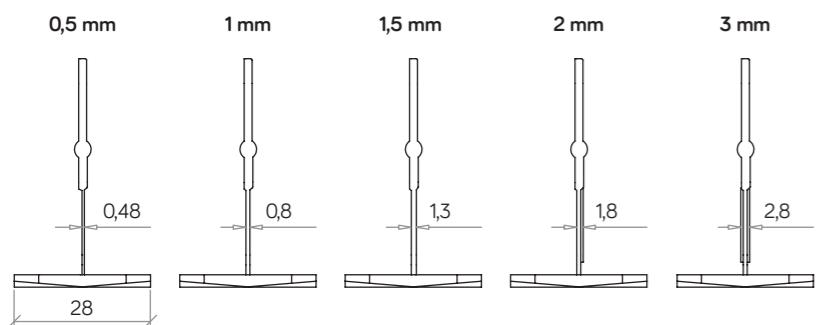

CLIPS FOR CERAMIC

Model : Clips Levelling System

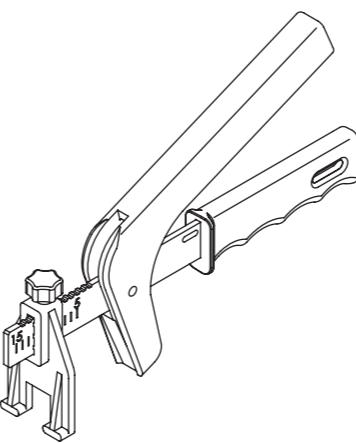

It is used to adjust heavy parts quickly and effectively.
It is available in different sizes, depending on the desired thickness.

COMPOSITION

Polyamide

PLIER CERAMIC

SP 2057

WEDGE ADJUSTMENT PLIERS

Model : Plier Ceramic

It is used for thicknesses between 3 and 15 mm. in ceramics.

* Wedge-base is required for thickness between 3 and 5 mm.

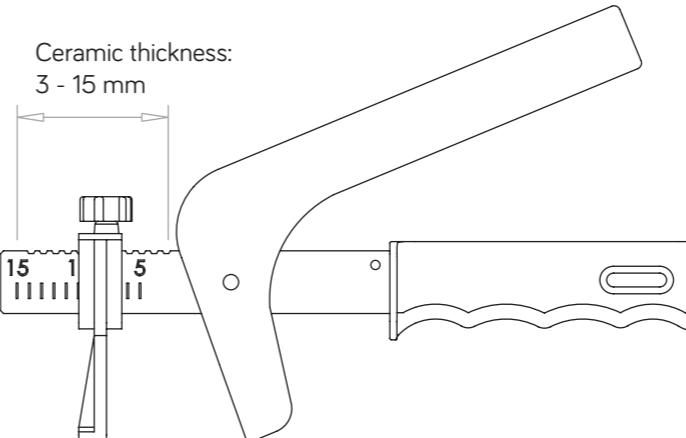

The parts in contact with the tile are made of plastic to avoid damages.

COMPOSITION

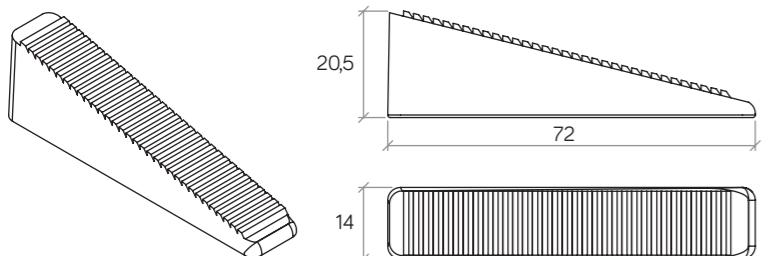

Polyamide

Fiber

Stainless steel

WEDGES

SP 2043

WEDGES FOR CERAMIC

Model : Wedges Levelling System

The wedge is adjusted in the chock with our Levelling System Pliers.

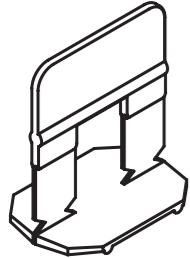

Its base is completely rounded, which prevents the porcelain from being damaged when the system is removed.

COMPOSITION

Polyamide

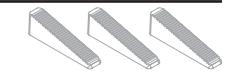

Fiber
